

## What a wheel service covers

### Inspection

#### External

- External appliance wiring visual check
- Seals and general mechanical condition
- Foot pedal

#### Internal

- Wiring both inside the wheel body and in the foot pedal
  - Drive: belt / cone / motor
  - Signs of water/clay ingress
- 

### Testing

- Earth continuity test
  - Switches, controls and indicators
  - Electrical insulation resistance test
  - Speed control
- 

### Remedial work

- Lubricating of bearings and speed control if applicable
  - Adjustment of speed control if applicable
  - Replacement of any wiring or connectors if required and I have the parts on me
  - Fixings secured
- 

### Report

- Results of inspections and testing
- Any future recommendations e.g. replacement of drive belt
